Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/784,196	Applicant(s) GERNOLD, PETER	
	Examiner Leon J. Harper	Art Unit 2166	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 November 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

1. The amendment filed 11/24/2006 has been entered. Claims 1-7, 15 have been amended. No claims have been added or canceled. Accordingly, claims 1-20 are pending in this office action.

Response to Arguments

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2166

Claims 1,7,15 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1,10, and 19 of copending Application No. 10784848. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter of the instant application would have been obvious to an artisan of ordinary skill in the pertinent art in light of the disclosure of application 10784848. Claims 1, 10 and 19 of application 10784848 are directed to receiving information from a user for use in generating data subscriptions, with steps for receiving, and storing distribution criteria and the type of data to be distributed and a step for generating data subscriptions based on the type of data to be distributed (See Application 10784848 claims 1, 10, 19). Claims 1,7,15 of the instant application are directed to accessing the type of data to be distributed, along with the distribution criteria and generating data subscriptions based upon the type of data and the distribution criteria. The instant application would have been obvious to an artisan of ordinary skill in light of claims 1,10 and 19 of application 10784848 because once an artisan can receive input identifying the type of data to be distributed, this information would have to be accessed in order to generate the data distribution.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5870605 (hereinafter Bra) in view of US 5884324 (hereinafter Chen).

As for claim 1 Bra discloses: access information identifying a type of data to be distributed to data sites (See column 15 lines 13-21); access information identifying a distribution criterion that defines the basis upon which the type of data is to be distributed to the data sites (See column 11 lines 25-30); access application data of various data types including the type of data to be distributed; (See column 8 lines 40-48); generate data subscriptions in a network of distributed computer systems operating an application program having the application data of the various data types (See column 5 lines 9-15) wherein each data subscription is generated based on the type of

Art Unit: 2166

data to be distributed to data sites, the accessed application data, and the distribution criterion (See column 5 lines 23-26), distribute a portion of the application data to the one or more data sites based on the generated data subscriptions (See column 12 lines 30-40).

While Bra does not differ substantially from the claimed invention the disclosure of) identifies a portion of the application data to be distributed to one or more of the data sites is not necessarily explicit. Chen however does disclose identifies a portion of the application data to be distributed to one or more of the data sites (See column 3 lines 62-67 note: if selected). It would have been obvious to an artisan of ordinary skill in the pertinent art to have incorporated the teachings of Chen into the system of Bra. The modification would have been obvious because both systems are directed to updating information and adding the publisher, subscriber model to the data replication system of Cheng would have made data replication more efficient by allowing replication to be done only when necessary based on the publisher, subscriber model (See Bra column 1 line 65- column 2 line 5).

As for claim 2, the rejection of claim 1 is incorporated, and further Chen discloses wherein the one or more code segments are further configured to: access information related to data sites wherein the data site information includes attributes and attribute values associated with a particular data site (See column 3 lines 45-50); and associate a particular data site with a particular data subscription based on the data site

Art Unit: 2166

information being related to the portion of application data to be distributed in the particular data subscription (See column 3 lines 59-64).

As for claim 3, the rejection of claim 1 is incorporated, and further Bra discloses: wherein the type of data to be distributed to data sites comprises a business object type (See column 6 lines 19-25).

As for claim 4, the rejection of claim 1 is incorporated, and further Bra discloses: wherein the type of data to be distributed to data sites comprises a publication (See column 5 lines 9-13).

As for claim 5, the rejection of claim 1 is incorporated, and further Chen discloses: wherein: the distribution criterion comprises an attribute of the type of data to be distributed, and the generation of data subscriptions comprises generating data subscriptions wherein each data subscription is generated based on the attribute of the type of data to be distributed to data sites (See column 3 lines 46-50).

As for claim 6, the rejection of claim 1 is incorporated, and further Chen discloses: wherein: the distribution criterion comprises a distribution criterion based on a relationship of a portion of the application data with an employee that uses a data site (See column 4 lines 14-17 authorization is a relationship), and the generation of data subscriptions comprises generating data subscriptions wherein each data subscription is generated based on the relationship of the portion of the application data with the

Art Unit: 2166

employee that uses the data site (See column 3 lines 55-60 note: if the user is not authorized then no subscription is generated).

Claims 7-14 are system claims containing substantially the same limitations as the computer readable medium claims 1-6 and are thus rejected for the same reasons as claims 1-6.

Claims 15-20 are method claims corresponding to computer readable medium claims 1-6 and are thus rejected for the same reasons as set forth in the rejection of claims 1-6.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leon J. Harper whose telephone number is 571-272-0759. The examiner can normally be reached on 7:30AM - 4:00Pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hosain T. Alam can be reached on 571-272-3978. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2166

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
